-Worked in both propagation and general plant care

PROJECTS

TinyApp

Javascript, CSS, HTML, Express

Shortens client-defined URLs. URLs can then be edited and deleted. Uses cookie data to display the proper shortened URLs to their relevant users

Tweeter

Javascript, CSS, HTML, Express, Jquery, Ajax

A single-page application that mimics twitters functionality. "Sent" tweets are stored to and rendered from a database in realtime. Supports desktop and tablet screen resoultions

Local Multiplayer Goofspiel

Javascript, CSS, HTML, Express, Socket.io, SQL, Jquery

Allows clients to play Goofspiel against other clients. Supports lobbies, win/loss history and basic leaderboards.

Interview Scheduler

React, Javascript/JSX, CSS, HTML, Axios

A single-page application that allows users to book, edit and delete interviews. Changes made on the website are persistent and update in realtime.
